

DOOR SECURITY

UPGRADE YOUR SECURITY WITH PTI

Individual unit security is an often overlooked but crucial component of self-storage security. Give your tenants peace of mind and distinguish yourself as a best-in-class self-storage operator with PTI's connected technology. Upgrading your facility security system with individual door alarms and smartlocks has never been easier.

DOORBOSS

DoorBoss is the self-storage industry's first completely wireless, remote-actuated electronic locking device for individual self-storage units.

RETROFITTABLE

A cost-effective solution that doesn't require disrupting your operations or your tenants

SIMPLE INSTALLATION

Can be installed on an occupied door in under 4 minutes – without the need to open units!

DURABILITY

Completely weather resistant and built to withstand even the harshest environments

INCREASED RENT

Additional security gives customers peace of mind and gives you the ability to charge more per unit

INCREASED EFFICIENCY

DoorBoss automates your lock checks and eliminates the need to manually walk the facility

BONUS FEATURE

Self-storage owners and operators can pair StorLogix software and a DoorBoss smartlock for the dual benefit of safeguarding your facility while also doubling as an individual unit notification system. If a DoorBoss smartlock is tampered with, StorLogix will notify management immediately.

DOOR ALARMS

SYSTEM FEATURES

- Compatible with a wide variety of alarm sensors and door switches
- Versatile and flexible - can be tailored to meet your facility's specific needs
- Alarms work during emergencies such as power outages and computer issues

WIRELESS ALARMS

Without the need to replace the existing infrastructure to install, wireless door alarms are more ideal for retrofitting existing sites. These alarm systems have a quick and easy installation, making them perfect for facilities that plan to expand in the future.

HARD-WIRED ALARMS

Hard-wired door alarms are a highly reliable and cost-effective solution for your security system. The simplicity of its installation makes a wired door alarm system easy to integrate with new builds and is a preferred choice for large-scale self-storage sites.

INTEGRATED SOLUTIONS

Products and services from PTI Security Systems can be configured to address every facility's unique requirements. Expand on the value of your network of individual door security with:

- EasyCode
- CORE Graphics
- Apex Keypads
