

# Worry-Free Interior Corridor System

## TRAC-RITE® NUSPACE HALLWAY SYSTEM

### Overview

The Trac-Rite Nuspace 1022 and 1044 hallway systems are practical solutions for converting existing buildings into storage space. Utilizing an existing building is cost effective, as it minimizes the amount of required building materials and takes advantage of property already approved for commercial use.

Featuring versatile, efficient, and flexible designs, these freestanding systems can also be installed within new construction. Nuspace corridor systems are constructed of quality, durable materials that offer worry-free maintenance and low upkeep costs.

Regardless of the existing building design, the hallway systems can be customized to maximize available space. Additionally, the systems' unit sizes can be tailored to meet your needs, and ultimately increase your rental income. Optional enhancements include diamond plate trim and corner guards, or ceiling systems with integrated lights.
